Subject: Falcon Refinery

Jonathan:

I need an update on the progress happening at the Falcon Refinery Site. I should be getting periodic written updates (weekly) so that I can keep track of and document ongoing activities even if no substantial activities are happening. The report should address those items below and any additional items you think may be useful to the Agency. If nothing is happening then you should be explaining why such activities are not moving forward and when they are expected to resume.

The following is what I believe is still outstanding related to the Removal Action AOC we have related to the Falcon Refinery:

- Tank 7: Disposal of waste placed in roll-off boxes;
- Tank 12 (Moved from T13): Treat/dispose of oily water and remove/dispose of any tank bottoms that accumulated;
- Refinery Piping/Equipment Evaluation/Removal: Evaluate/Remove/Dispose of waste within piping and equipment;
- Asbestos Evaluation/Removal: Evaluate/Remove/Dispose of Asbestos Containing materials;
- Final Report Plan: Begin preparation of final report for removal action including all information from 2003 to completion.

Thanks,

Gary W. Moore (6SF-ER)
